

## Architectural Drafting Contest Rules

Boise State University will host the architectural drafting contest.

1. The Thursday night "orientation" will not be necessary, however if the student is bringing ORIGINAL software other than 2006 AutoCAD or Architectural Desktop or Revit, this would be a good time to have it installed onto one of the computers. I feel that it is the participant's (advisor's) responsibility to contact Joe Marshall directly and set this up. His telephone number is: 208-426-2512.
2. If the students are worried about backing up their work they should bring a "flash drive" to save their drawings. The BSU computers are setup in such a way that whenever the computer is restarted, EVERYTHING is deleted from the C:\ drive.
3. The reference material that they can bring in shall be the same as at the national level.
4. Hand drafting is completely OPTIONAL and if a student is wanting to hand draft, they are responsible for bringing ALL necessary equipment.
5. Laptop computers will not be allowed. If the student wants to use other software they must bring original disks to BSU and have it installed prior to the competition.
