

Electronics Technology Competition

Here is a list of the basic student equipment needs. They may bring additional hand tools if they wish:

ESD wrist strap - YOU WILL NOT PARTICIPATE WITHOUT THIS!!!

Toolkit with flashlight

Wire stripper including 20 and 22 gauge

Small flat screw driver

Safety glasses

Solder wick

Wire snips

Pliers

Adjustable wrench

Pot tweaker

DMM and probes (there may be a few available at the competition to borrow but there is no guarantee that there will be available DMMs or that the student will be familiar with the ones that are available).

Basic calculator (no data storage allowed). The test can be done without a calculator but basic calculators are acceptable.

Calculators such as TI86, TI89, Voyage200, and TI92 will not be allowed on the test. A good rule of thumb is if the calculator cost more than 30 dollars, it probably will not be allowed on the test.

Dress - Should be appropriate to a business environment.

Contestants will NOT need to bring any software or hardware manual's with them.

Resumes **MUST** be turned in at 8:00 a.m. Friday morning, no exceptions. (Points will be deducted if late).
